PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science & Engineering student (CGPA 8.85/10) with a full-stack development background spanning React, Node.js, Express, and Spring Boot on the frontend and backend, and MySQL/MongoDB on the data layer. Built and shipped three end-to-end applications across two stacks (MERN and PHP/MySQL), covering authentication, REST API design, relational and document database modeling, and role-based access control. Completed a six-week full-stack internship at Visanet Software, contributing to front-end development, PHP/MySQL back-end logic, and RESTful routing on a production restaurant-website codebase. Holds 11 certifications across cloud computing, generative AI, prompt engineering, and Python-based data analysis. Comfortable moving across the stack and open to Software Engineering, Full-Stack, Backend, or Frontend roles.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, PHP, C

Frontend: React.js, HTML5, CSS3, Bootstrap 4, jQuery

Backend & Frameworks: Spring Boot, Spring MVC, Node.js, Express.js, RESTful API Design, PHP

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, VS Code, XAMPP

Cloud & AI: Cloud Computing Fundamentals, Generative AI, Prompt Engineering, Data Analysis

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (DBMS)

PROJECTS

ShopNest — E-Commerce Platform

Full-stack e-commerce platform with product listings, cart management, JWT authentication, and an admin dashboard for order and inventory control, built on the MERN stack.

- Architected the React.js front end covering product browsing, cart, and checkout flows
- Built a Node.js/Express REST API layer to serve product, cart, and order data
- Designed MongoDB schemas for catalog, cart, and transactional order data
- Implemented JWT-based authentication to secure user sessions
- Built an admin dashboard for inventory and order management

Stack: React, Node.js, Express, MongoDB, JWT

Suryavanshi Clinic — Hospital Management System (Academic Project)

Hospital information system managing patient records, appointments, prescriptions, lab reports, pharmacy inventory, payroll, and billing, secured with role-based access control.

- Modeled a relational MySQL schema spanning patients, staff, prescriptions, lab reports, pharmacy inventory, payroll, and billing
- Implemented role-based access control differentiating admin, medical, and pharmacy staff views
- Built a responsive front end using Bootstrap 4, HTML5, CSS3, and jQuery

Stack: PHP, MySQL, Bootstrap 4, HTML5, CSS3, jQuery

Grand Line — Restaurant Website

Full-stack restaurant website built during the Visanet Software internship, featuring a dynamic menu, reservation system, and admin panel with server-side rendering.

- Designed database-driven menu pages and a reservation system with server-side validation
- Implemented an admin panel for content management

Stack: PHP, MySQL, HTML5, CSS3, JavaScript, XAMPP

PROFESSIONAL EXPERIENCE

Web Development Intern

Visanet Software Private Limited

Jun 12, 2023 – Jul 22, 2023 (6 weeks, on-site)

Contributed to the full-stack development of Grand Line, a professional restaurant website, gaining hands-on experience across the software development lifecycle — from requirements and UI design to server-side logic and database integration.

- Designed and developed key front-end pages for the Grand Line restaurant website, improving visual presentation and user experience
- Implemented server-side features in PHP and integrated MySQL databases for dynamic content and data management
- Applied RESTful principles to structure back-end routes and collaborated with the development team to resolve bugs and improve stability
- Set up and maintained local development environments using XAMPP, supporting efficient team testing and iteration

Technologies: PHP, MySQL, HTML, CSS, JavaScript, XAMPP, VS Code

EDUCATION

B.Tech — Computer Science & Engineering 2024 – 2027 (Expected)
Maharashtra Institute of Technology, Chhatrapati Sambhajinagar (Autonomous University)
CGPA: 8.85 / 10 — Currently Pursuing

Diploma — Computer Engineering 2021 – 2024
Government Polytechnic Washim | MSBTE, Maharashtra State Board of Technical Education
Percentage: 84.44%

SSC — Secondary School Certificate (10th Grade) 2021
Nath Vidhyalaya Mangrulpir | Maharashtra State Board of Secondary & Higher Secondary Education
Percentage: 85.60%

CERTIFICATIONS

- Cloud & AI**
- Introduction to Cloud Computing — Google / Coursera (2026)
 - Introduction to Generative AI — Google / Coursera (2026)
 - Prompt Engineering — Coursera / IBM (2026)
 - Introduction to Vibe Coding — Microsoft Learn (2026)
 - AI Techies Workshop Certificate — AI Techies (2026)

- Data & Databases**
- Data Analysis Using Python — Coursera / IBM (2026)
 - Python for Data Science — Coursera / IBM (2026)
 - Introduction to MongoDB — MongoDB University (2026)

- Programming & Development**
- Git and GitHub — Udemy (2025)
 - Python for Beginners — Udemy (2025)
 - C Programming Course — MCCE / Om Sai Computer Education (2022)

ADDITIONAL INFORMATION

- Actively seeking internships, entry-level Software Engineering roles, graduate program placements, and open-source collaboration opportunities
- Continuously expanding technical breadth through self-directed coursework in cloud computing, generative AI, prompt engineering, and data analysis
- Comfortable working across the full stack, adapting to frontend, backend, or database-focused responsibilities as a team requires
